

OUR HISTORY

This space was once a goldsmith's workshop, property of Mr. António Manuel Barata, artisan goldsmith himself, having been active since mid-nineteenth until July 2011.

We tried to recover the space, preserving it as best as possible, with the intent of honoring both the art and its craftsmen, as well as preventing the historical and cultural importance of these spaces from falling into oblivion, thus giving a second life to Mr. António's workshop.

Countless pieces of jewelry were created in this space, with hardwork, art and love. Now in this new life we gave to the workshop, we aspire to put the same hardwork, art and love into every glass, pot or plate.

The images on the wall are sketches that show the creative process behind the beautiful jewelry pieces once made in this space.
